CERTIFIED MAIL-RETURN RECEIPT REQUESTED

Dr. Franklin Wolff
Box 559
Lone Pine, California

Dear Dr. Wolff:

Last August you met with representatives of the Inyo National Forest concerning the special use permit you hold for the operation of a summer school on Tuttle Creek. At that time it was brought out that very little, if any use had been made of the building and site since 1950, also, at that time, you were informed of the study preparatory to reclassifying the High Sierra Primitive Area as the High Sierra Wilderness Area. The study was made and it has been determined that it will be in the public interest to change the boundary of the existing Primitive Area. An eastern extension of the present boundary in the Tuttle Creek Drainage encompasses the site covered by your special use permit.

The management policy for Wilderness Areas precludes occupancy permits on National Forest land such as the Tuttle Creek site. Since your group has not used the site for the purpose (school) stated in your permit for at least ten years, the permit is hereby terminated effective December 31, 1963 as per a clause in your permit. You are hereby given until eight months from the terminating date of the permit to remove your personal property and the improvements, insofar as you desire, from the permitted site. Anything remaining on the site after August 31, 1964 will become the property of the government for disposal as may be in the public interest.

If you have any questions, Forest Supervisor J. T. Radel, Inyo National Forest, Bishop, California will be glad to answer them.

Sincerely yours,

Chas. A. Connaughton
Regional Forester
