

The Occultism of Chemistry.

- I. Chemistry the child of ancient alchemy.
- A. Alchemy not the crude thinking of early man
1. Dealt with a different problem from modern chemistry.
 2. Primarily concerned with the transmutation of gross elements in the nature of man.
 3. However, since discovery of radium idea of transmutation of physical elements has become recognized
 - a. Discuss breaking down of atoms thru loss of electrons; Uranium, radium to Pb also ultimately to H.

- II. The four elements primarily connected with Life H, O, N, C,
- A. 97% of body made up of these elements.
 - B. Correspondences of these elements.

H	O	N	C
Fire	Air	Water	Earth
Tejas	Vayu	Apas	Prithivi
Kama Rupa	Prana	Linga Sharira	Gross Body.
Spring	Summer	Autumn	Winter
Morning	Noon	Evening	Night
Youth	Adolescence	Manhood	Age
East	South	West	North

- III. Upper atmosphere mouth of earth, lower stomach.
- A. Those in lower atmosphere breath refuse, and are doomed to die.
 - B. Higher atmosphere free from carbon, and also has pure psychosphere.
 1. Hence natural physical habitat of the Yogi is in mountains.
 - C. By securing right allotropized form of O can make substitute for Elixer of Life.
- IV. Illustration of Being and Not-Being in H and O on one hand and H₂O on the other.
- A. O and H die as gasses to be born as water, which may be more real state.
 - B. This illustrates how Non-Being of Pralaya is a state of more intense Being.
 - C. One must lose his life to find it. To be born in the new one must die to the old. Universal law of compensation.
