

Significance of Death.

1. Difficulties involved in problem of death largely grow out of an erroneous statement of the problem.
2. Death not a state but a process.
3. Life to be regarded as the complex of which Birth and Death are modes.
4. Birth and Death the process of Becoming-becoming-not.
5. The whole universe of experience is continually transforming yet that transformation does not destroy its Being.
6. Fear of death is based upon fear of break in continuity of consciousness.
7. Realization that Life is a Fire of continual transformation and that Life is Consciousness removes this fear.
8. The concept of Consciousness as a plenum and as focalized and polarized.
9. The transformation from polarized to unpolarized Consciousness equivalent to cataclysmic death.
10. The fact of altruism is at least evidence of a super-egoic type of Consciousness.
11. Knowledge of after-death states of man dependent upon knowledge of constitution of man.
12. Reconciliation of continuity of Life or Consciousness with lamellar organization in states of Consciousness found in taking a non-spacial and non-temporal reality and spreading it out in space and time.
13. Illustration of the Cycloid.
